

Amendments to the Claims

1 Claim 1 (currently amended): A content previewer, comprising:

2 a graphic previewer image comprising a virtual sensor portion and a content-previewing
3 portion;

4 means for placing enabling a user to position the virtual sensor portion of the graphic
5 previewer image over a representation of content to be previewed; and

6 means for rendering, within the content-previewing portion, a preview of the content to
7 be previewed, responsive to operation of the means for placing determining that the virtual
8 sensor portion has been positioned over the representation of the content.

1 Claim 2 (currently amended): A method of previewing content in a computing system,
2 comprising steps of:

3 providing a previewer graphic for dragging over a representation of content to be
4 previewed, the previewer graphic comprising a virtual sensor portion and a content-previewing
5 portion; and

6 rendering, within the content-previewing portion, a preview of the content to be
7 previewed, responsive to detecting that the virtual sensor portion has been positioned over the
8 representation dragging of the provided previewer graphic.

1 Claim 3 (original): The method of Claim 2, wherein the representation is a hyperlink and the
2 content to be previewed is a Web page.

1 Claim 4 (original): The method according to Claim 2, wherein the representation is a file name
2 and the content to be previewed is a stored file.

1 Claim 5 (original): The method according to Claim 3, wherein the rendered preview comprises
2 a thumbnail version of the Web page.

Claim 6 (canceled)

1 Claim 7 (currently amended): The method according to Claim 3, further comprising steps of:
2 navigating to the Web page, response responsive to a user's request; and
3 displaying the Web page, responsive to the navigating.

1 Claim 8 (original): The method according to Claim 7, wherein the user's request is signalled by
2 clicking within the previewer graphic.

1 Claim 9 (original): The method according to Claim 7, wherein the previewer graphic remains
2 positioned over the displayed Web page.

1 Claim 10 (original): The method according to Claim 2, wherein the previewer graphic replaces a
2 cursor of a visual display of the computing system.

1 Claim 11 (original): The method according to Claim 2, wherein the rendered preview uses

cached information associated with the content to be previewed.

Claim 12 (original): The method according to Claim 2, wherein the representation is a file icon and the content to be previewed is a stored file.

Claim 13 (currently amended): A system for previewing content in a computing system, comprising:

means for providing a previewer graphic for dragging over a representation of content to be previewed, the previewer graphic comprising a virtual sensor portion and a content-previewing portion;

means for detecting that the virtual sensor portion provided previewer graphic has been dragged over the representation; and

means for rendering, within the content-previewing portion, a preview of the content to be previewed, responsive to the means for detecting, ~~wherein the rendered preview is rendered within the previewer graphic.~~

Claim 14 (currently amended): A computer program product for previewing content in a computing system, the computer program product embodied on one or more computer-readable media and comprising:

computer-readable program code means for providing a previewer graphic for dragging over a representation of content to be previewed, the previewer graphic comprising a virtual sensor portion and a content-previewing portion;
